Apollo Hospitals launches dedicated Diabetic Foot Clinics

Dr. Prathap C. Reddy

across the country.

Dr. Prathap C. Reddy, Chairman, Apollo Hospitals Group said, "The proportion of diabetes among the NCDs is increasing at an alarming pace. A government study earlier this year showed that 11.5% of Indians above the age of 45 had diabetes. Among the most common complications is diabetic foot that results from the dual impact of peripheral artery disease and diabetic neuropathy (nerve damage). There

is lessening of sensations such as pain leading to serious injury from even a small blister that gets infected, which may require amputation of the limb. Studies have shown that around 85% of all diabetes related foot or leg amputations begin with a foot ulcer. The Apollo Diabetic Foot Clinic will be a Centre of Excellence for diabetic foot care and would help in addressing this growing healthcare challenge."

The multi-disciplinary team at the Diabetic Foot Clinic would include diabetologists, orthopaedic and vascular surgeons, interventional radiologists, microbiologists, podiatrists specialized in treatment of feet and lower limb related disorders, specialist nurses, and technicians skilled in the biomechanics of

movement.

Dr Sangita Reddy, Joint Managing Director, Apollo Hospitals Group said, "People with diabetes are at greater risk of complications and infection, and disease of the foot remains a major threat. The growing incidence of lower limb amputations in India, currently at around 40,000 every year is a matter of concern as most of these are due to diabetes. The pain, effect on mobility, depression and inability to work after foot ulcers and amputations have a devastating impact on the quality of life. At the same time, no single person can treat a diabetic foot. It needs an expert dedicated multidisciplinary team. Studies have shown that structured multidisciplinary diabetic foot care leads to a significant reduction in lower-extremity amputation rates."

The Apollo Diabetic Foot Clinics would provide a comprehensive range of treatments from prevention to reconstruction including ulcer debridement and infection control, soft tissue balancing procedures, bone exostectomy, minor amputations, acute deforming charcot correction, major deformity corrections, advanced Wound Care using hyperbaric oxygen therapy and two-stage reconstruction.

37% samples tested for HbA1c in Chennai found to be diabetic

Chennai, Nov 14: SRL Diagnostics prepared a Data Analytics Report on results of randomized samples received for Glycosylated/Glycated Hemoglobin (HbA1c) from January 2017 till September 2021 in the city of Chennai. This report has been prepared on the basis of a retrospective data mining done on results of 32,750 tests done for HbA1c.

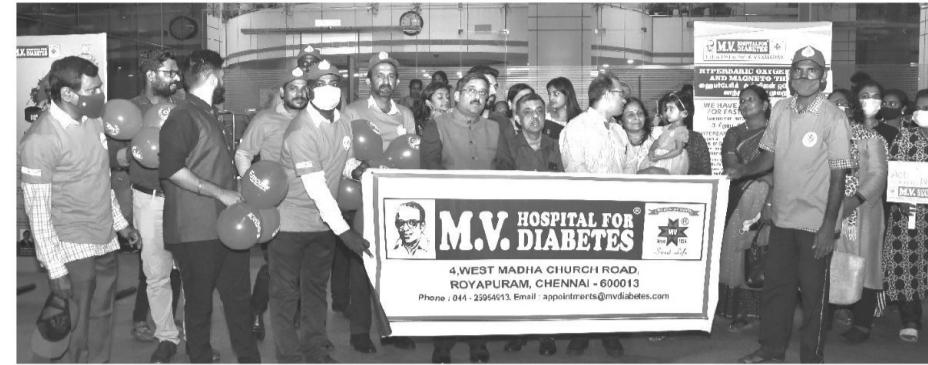

A report published in 2009 by an International Expert Committee on the role of HbA1c in the diagnosis of diabetes

recommended that HbA1c can be used to diagnose diabetes and that the diagnosis can be made if the HbA1c level is $\geq 6.5\%$. Levels of HbA1c just below 6.5% may indicate the presence of intermediate hyperglycaemia. The precise lower cut-off point for this has yet to be defined, although the ADA (The American Diabetes Association) has suggested 5.7 – 6.4% as the high-risk range. While recognizing the continuum of risk that may be captured

by the HbA1c assay, the International Expert Committee recommended that persons with an HbA1c level between 6.0 and 6.5% were at particularly high risk and might be considered for diabetes prevention interventions.

For people without diabetes, the normal range for the HbA1c level is less than 5.7%. HbA1c levels between 5.7% and 6.4% mean one has a higher chance of getting diabetes (pre-diabetes). Levels of 6.5% or higher mean one has diabetes.

M.V. Hospital illuminates Anna Centenary Library on the occasion of World Diabetes Day

Chennai, Nov 14: Creating a record in India by lighting Blue of various iconic buildings for the thirteen consecutive years, M.V Hospital for Diabetes, Royapuram hosted the celebration this year on the eve of World Diabetes day by illuminating Anna Centenary Library, blue today. The theme of International Diabetes Federation for World Diabetes Day 2021 is 'Access to Diabetes Care' – If not now, when?.

Dr. Vijay Viswanathan, Head and Chief Diabetologist, M.V. Hospital for Diabetes and Prof. M Viswanathan Diabetes Research Centre, Royapuram, Chennai presided.

monuments across the world are lit blue to spread awareness on Diabetes. In India, M V Hospital for Diabetes and Prof. M Viswanathan Diabetes Research Centre, Royapuram, Chennai who is currently the President of D-Foot International, said on the occasion of the World Diabetes Day we are launching a novel program for the citizens of Chennai CAPS-D (Chennai Amputation Prevention Service- Diabetes). In this program we will provide our services to people with Diabetes who have a high risk of amputation. The service will include simple foot tests to detect loss of sensation & less blood supply to leg. This will be offered at Rs. 550/- said Dr. Vijay Viswanathan. There is also a proposal to do this project in the homes of people according to him.

On the occasion of World Diabetes Day, 14 November, famous

This year we are lighting up Anna Centenary library which is South Asia biggest library

The Anna Centenary Library (ACL), a state-of-the-art library was inaugurated on September 15, 2010 on the occasion of the 102nd birth anniversary of the former Chief Minister of Tamil Nadu Dr. C N Annadurai popularly called 'ANNA'. By reason of his great interest towards the books and library, this library is named as 'Anna Centenary Library'.

Thiruppugazh to head Flood Management Committee

Chennai, Nov 14:

Retired IAS officer V. Thiruppugazh, who served in Gujarat under the then Chief Minister Narendra Modi and also in the National Disaster Management Authority (NDMA) under the Prime Minister, has been appointed by the DMK government to lead an advisory panel on mitigation and management of flood risk in the city.

A G.O. issued on October 22 regarding the formation of the committee noted that Chennai was prone to natural disasters and cyclones. Chennai's terrain was flat with most of the area at an average elevation of 2 m above Mean Sea Level and certain areas were even below the sea level.
